

Scoring Balloon Catheter for effective lesion preparation

Novel Scientific Engineering

Excellent product features for precise dilatation across a wide range of lesion types

Triangle shaped Non-Slip Elements

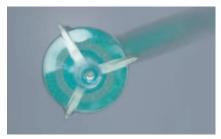

- Eliminating slippage during balloon expansion (1)
- High trackability even in tortuous vessels (1)
- Scoring balloon performance in calcified lesions

Indications		
Bifurcated lesion		
SR lesion		
Small vessel dilatation		
Highly calcified lesion		
Ostial lesion		
Preparation		

High flexibility and mechanical performance

Flexible scoring elements are only attached at the distal and proximal ends and lead to a PTCA balloon-like tracking.

Once the balloons is inflated, the nylon elements find the final position for best mechanical performance.

NSE Alpha[™] Scoring Balloon for effective lesion preparation

Full therapeutic concept - NSE Alpha[™] + SeQuent[®] Please NEO

NSE Alpha[™] together with B. Braun's latest generation drug coated balloon catheter SeQuent[®] Please NEO is an excellent treatment combination to achieve a better clinical outcome in various indications.

Treatment options with NSE Alpha[™]

- Lesion preparation for complex PCI
- Predilatation of de-novo lesions for DCB-only treatment
- Dilatation without balloon slippage in ISR
- Preparation before stenting in calcified lesions

Technical data		Balloon diameter	Article number
Balloon scoring element material	Nylon	2.0 mm	NSA20013
Number of scoring elements	3	2.25 mm	NSA22513
Proximal shaft	2.2 F	2.5 mm	NSA25013
Distal shaft	2.7 F	2.75 mm	NSA27513
Nominal pressure	6 atm		
Rated burst pressure	14 atm	3.0 mm	NSA30013
Balloon length	13 mm	3.5 mm	NSA35013
Guidewire compatibility	0.014''	4.0 mm	NSA40013

Distributer B. Braun Melsungen AG | Vascular Systems | Sieversufer 8 | 12359 Berlin | Germany Phone +49 30 568207-300 | www.bbraun.com
